

Redefining the Future

ONGC Petro additions Limited Energy Management Policy

We at **ONGC Petro additions Limited (OPaL)** are committed to manufacturing and supplying high quality Petrochemical Products to National & International Markets and to demonstrate continual improvement in our business performance by institutionalizing a robust Energy Management System with consistent focus on meeting the aspirations of our valued customers and stakeholders by ensuring optimal use of natural and other resources.

To achieve this, we shall:

- **Reduce** overall specific energy consumption with each passing year considering changes in levels of activities and other relevant factors.
- **Integrate** energy management with business objectives to improve energy performance.
- **Comply** with all relevant legislation to energy specific requirements.
- **Procure** energy efficient products and services that impact on overall energy performance of organization.
- **Organize** training programs for all relevant personnel in pursuit of creating awareness about energy conservation.
- **Ensure** monitoring and improvement of consolidated energy consumption of complex.
- **Upgrade** equipment(s), hardware and technology as and when required to optimize energy consumption and utilize resources efficiently.
- **Promote** usage of renewable energy to mitigate climate change impacts.
- **Adopt** life cycle thinking considering energy performance at design stage for any new system and during modification of facilities, equipment and system.

We shall communicate this policy to all stakeholders and conduct review and its adequacy, effectiveness and suitability at all levels of the organization.
